

Your Legal Rights

by **George Allen Moore**
Injury Attorney

INFLUENTIAL DECISIONS

December in National Drunk and Drugged Driving (3D) Prevention Month, which was first instituted by President Ronald Reagan in 1982 with the goal of promoting awareness of a national problem. While much progress has been made since then, anyone involved in a fatal crash in which alcohol and/or drugs was a factor can tell you that one such death is too many. Many of us are aware of statistics numbering in the thousands and millions, but this problem quickly becomes personal. For every injury or fatality, there is an entire network of family and friends who suffer. To spare each of these individuals the pain of experiencing irreplaceable loss and

unbearable hardship, drivers are urged to make the right decisions.

At my practice, we believe every case is important and every client deserves personal attention, compassion and an attorney who will fight for their rights. If you have questions about personal injury suits or believe you may have a case, call us for a free initial consultation. Our office emphasizes personal injury cases. For your convenience, we offer hospital and in-home visits.

HINT: More than 1.5 million people were arrested in the United States last year for driving drunk, and at least that many are suspected of driving drunk under the influence of drugs.
